## The Cheetah

The cheetah is the fastest animal on land. It can run 100 kilometers an hour. It is now rare and is one of the animals which is in danger of extinction. The cheetah has a small head and ears, and long, powerful legs. It always hunts and chases its prey on open ground. This is a different way of hunting from the other "big cats." They like to stay in and near trees to catch their prey. The cheetah is also different from other cats because it cannot draw in its claws. (Source: Abbs, Brian, et.al. *Take Off. Long, long ago, when the gods and goddesses used to mingle in the affairs of mortals, there was a small kingdom on the slope of Mount Wayang in West Java. The King, named Sang Prabu, was a wise man. He had an only daughter, called Princess Teja Nirmala, who was famous for her beauty but she was not married. One day Sang Prabu made up his mind to settle the matter by a show of strength.

After that, Prince of Blambangan, named Raden Begawan had won the competition. Unfortunately, the wicked fairy, Princess Segara fell in love with Raden Begawan and used magic power to render him unconscious and he forgot his wedding. When Sang Prabu was searching, Raden Begawan saw him and soon realized that he had been enchanted by the wicked fairy. The fairy could not accept this, so she killed Raden Begawan. When Princess Teja Nirmala heard this, she was very sad. So a nice fairy took her to the Kahyangan.

9. What do you think will happen if gods or goddesses cannot mingle in the affairs of people in the earth at that time?

The forest and peat land fires and smog, billed the worst in Indonesian history, still dominated media headlines this week, with thousands of hot spots covering Sumatra and Kalimantan. At least 19 people in Sumatra and Kalimantan have died, and mostly children, have been hospitalized because of severe respiratory illness cause by the haze. According to the National Disaster Mitigation Agency (BNPB), the ongoing haze crisis has resulted in more than 500,000 people in six provinces – Riau, Jambi, South Sumatra, West Kalimantan, Central Kalimantan, and South Kalimantan – suffering from respiratory infections.

As evidence indicates that most hot spots are related to oil and palm and pulpwood plantations, President has instructed the Forestry and Environment Ministry to stop issuing new permits for peat land cultivation for monoculture restore damage peat land and review all peat land licenses that have been issued. Put bluntly, companies can no longer convert active forests and deep peat or any peat area into monoculture plantations, such as acacia for pulp and oil palm plantations.

Recent research by forest scientists at the Bogor, West Java-based Center for International Forestry Research (CIFOR) found that peat swamps in their natural state are resistant to fire because they are wet underground, but they can be highly flammable when they dry out and are degraded.
